

The image shows the grand, classical facade of the American Museum of Natural History. The building is constructed of light-colored stone with large columns and a pediment. Several banners are hanging from the facade: a blue one on the left with a yellow heart shape and the words 'TREASURE BEAUTY POWER GOLD', a large central one for 'HALL OF HUMAN ORIGINS' by Anne and Bernard Spitzer, and a blue one on the right with butterflies and the words 'The Butterfly Conservatory'. The words 'KNOWLEDGE' and 'VISION' are inscribed on the building's facade. In the foreground, there are people walking on the sidewalk, a statue on a pedestal, and a small outdoor market stall with a striped awning.

KINETIC BIRD SPECTACLE: NATURAL HISTORY MUSEUM

JENNA DEMCHUK | REGINA FLORES | JAS RANDHAWA
ASSIGNMENT 3
INTERACTIVE SPACES

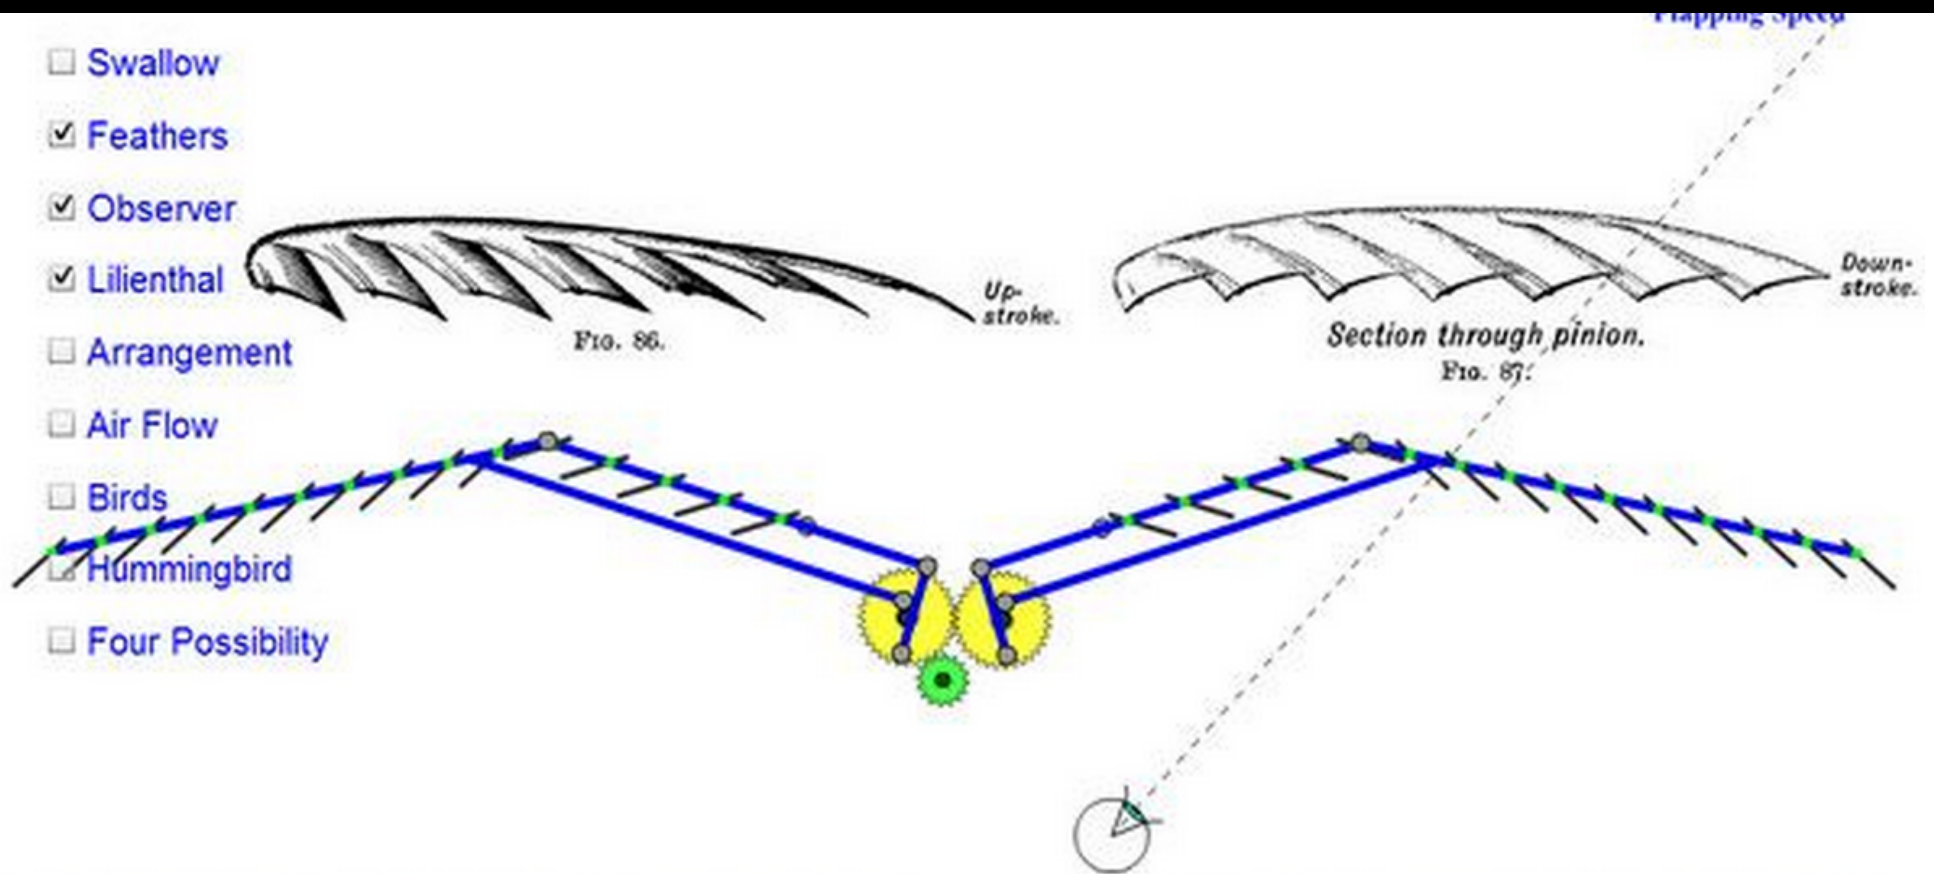

NATURAL HISTORY MUSEUM: KINETIC BIRDS

- Marine and dinosaur exhibits are awe inspiring, grande and exciting
- Bird exhibits are static and meek and make the spaces flat
- Using a kinetic spectacle in the exhibition rooms we will augment the experience and create more interest and excitement about the bird halls
